Stefan Röhr

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to 300,000 USD.

Particulars of the approval

Reference Documents:

- Checklist 20.096a issued 2024-07-23.

Approval Basis:

- Workshop inspection by DNV, 2024-07-23.

Approved production site:

DYNEXA GmbH & Co. KG
Dr.-Werner-Freyberg-Str. 7
69514 Laudenbach
Germany

Approval conditions:

The company is obliged to manufacture components according to the Rules of DNV whenever the components are design approved by DNV. This obligation is effective without detriment, regardless of contracts closed between manufacturer and customer. If no Approval of Manufacturer (AoM) certificate is necessary for the construction of certain components being examined by DNV, the company is only free of the obligation if they submit notification in writing to DNV before construction begins.

The company shall prepare an inspection plan for each type of component before start of construction and submit it to DNV. The plan shall clearly indicate the duties of construction and quality control. This inspection plan has to be approved by DNV prior to start of production.

Alterations or modifications within the company having substantial influence upon the manufacturing quality (e.g. alterations in construction methods and/or construction facilities) and changes in the qualification of personnel are to be immediately indicated in writing to the DNV surveyor in charge or to DNV Approval Centre.

Should any check reveal any deviations from the AoM a determined period will be arranged for the elimination of these deviations and if necessary, a subsequent examination will be undertaken. Should the subsequent examination establish that the deviations have not been eliminated, DNV is entitled to withdraw the approval. Should DNV get knowledge about any damages on products the company is responsible for, DNV is entitled to suspend the AoM until the deficiencies are remedied or to withdraw this certificate.
